

COMING SOON! A New Lincoln Elementary

We're **FALL**ing into a construction groove at the site of the new Lincoln Elementary as crews continue to make noticeable progress on the building!

RECENTLY COMPLETED WORK

- Concrete slabs poured inside the building
- The last of the steel was erected
- Interior wall framing started
- Mechanical/electrical rough ins started inside the building
- Exterior framing continued on the building and exterior stone veneer started
- Final seeding established in some areas

UPCOMING WORK

- Exterior brick/stone veneer will continue
- Interior wall framing will continue
- Roofing will start
- Windows will begin to go in
- Mechanical and electrical will continue to run their rough-in piping and conduit

DID YOU KNOW?

The black coating being applied to the exterior of the building is a fluid air weather barrier. This barrier is a modern day version of the traditional building wrap (Tyvek) most people are used to seeing.
